## EVANS AGAIN HEADS KENNEL ORGANIZATION

Capt. Porter's "Lassie B." Wins First  
Prize for Airedale Dogs, and  
He Receives Cup.

John O. Evans and Charles A. Watson  
were re-elected president and secretary-  
treasurer, respectively, of the Wash-  
ington Kennel Club last night at its annual  
meeting. R. H. Atkinson was elected vice  
president. A committee consisting of  
H. Atkinson, E. Roy Routh, S. G. Held,  
Dr. G. N. Payette and James P. Moore  
was chosen to run the annual bench  
show.

The committee may change the date  
of this year's show from March 12, 14  
and 15 to a later date in March.

Last night in a match for Airedale  
and Boston terriers, first Airedale prize  
went to Capt. Porter's "Lassie B."  
and his "Peggy Porter" captured the  
second ribbon. Mrs. R. H. Johnston's  
"Bessie" was awarded third prize. First  
prize for Boston terriers went to J. P.  
Moore's "Billie Cricket." "Kip,  
the Third" won the second ribbon, while  
the prize for female dogs was awarded  
to "Countess Dee Cree," owned by  
E. Roy Routh.

A cup for the best Airedale terrier,  
presented by Miss Jean G. Hinkle, was  
given to Capt. Porter for his "Lassie B."

The next match of the club will be  
held in February.

## DIPHTHERIA RIFE AT INDUSTRIAL SCHOOL

Thirteen Cases Reported at Tenny-  
town Institution, Which Is Tem-  
porarily Closed.

Thirteen cases of diphtheria were re-  
ported in the Industrial Home School in  
Tennytown, as a result of which the  
school was not opened for its second  
semester by the District health officer.  
Twelve of the cases are of a "car-  
rier" nature and the thirteenth is a clinical  
case. None of the pupils has been con-  
fined to his bed, it was said at the  
school.

The institution, indirectly under the  
supervision of the office of the District  
superintendent of public schools, was the  
only school in Washington not to resume  
work yesterday following the midwinter  
holidays. While probably a dozen school  
pupils are sick with diphtheria, the cases  
are scattered over the District. No one  
community has reported enough cases of  
the disease to make conditions alarming.

E. L. Thurston, the superintendent, said  
yesterday.

C. W. Skinner, superintendent of the  
Industrial school, said yesterday the pu-  
pils who have been exposed to the dipht-  
heria germ had been segregated, al-  
though none had become ill with the  
disease.

**Overrules Auto Damage Suit.**

The owner of an automobile cannot be  
held for damages for an accident result-  
ing from the reckless driving of his ma-  
chine after he has been stopped, even if  
the agent of the owner negligently left  
the switch key in the machine. Justice  
Van Orsdel, of the Court of Appeals,  
handed down this decision yesterday in  
the case of Mary L. Squines against Leo  
C. Brooks.

## SAVE YOUR HAIR AND BEAUTIFY IT WITH "DANDERINE"

Spend 25 cents! Dandruff dis-  
appears and hair stops  
coming out.

Try this! Hair gets beautiful,  
wavy and thick in  
few moments.

If you care for heavy hair, that  
glistens with beauty and is radiant  
with life, is free from itching, dandruff,  
and is fluffy and lustrous, try  
Danderine.

Just one application doubles the  
beauty of your hair, besides it imme-  
diately dissolves every particle of dandruff  
and you cannot have nice, heavy,  
healthy hair if you have dandruff.

This destructive scurf robs the hair  
of its lustre, its strength and its very  
life, and if not overcome it produces a  
feverishness and itching of the scalp;  
the hair roots fall out, loosen and die;  
then the hair falls out fast.

If your hair has been neglected and  
is thin, faded, dry, scraggy or too  
oily, get a 25-cent bottle of Knowl-  
ton's Danderine at any drug store or  
toilet counter; apply a little as direct-  
ed and ten minutes after you will say  
this was the best investment you ever  
made.

We sincerely believe, regardless of  
everything else advertised, that if you  
desire soft, lustrous, beautiful hair and  
lots of it—no dandruff—no itching  
scalp and no more falling hair—you  
must use Knowlton's Danderine. If  
eventually—why not now?

## FOR THE COMMON WANT PROHIBITION ISSUE

Board of Trade Directors  
Voted on by Populace.

**GOCKELER BACKS PLAN**

Former Secretary Presents Resolution  
Which Neither Favors Nor Op-  
poses Anti-Liquor Law.

A referendum vote by the people of the  
District on the question of District pro-  
hibition was favored yesterday by directors  
of the Washington Board of Trade.

A resolution requesting Congress to au-  
thorize such a vote was submitted by  
J. Gockeler, former secretary of the  
board, and was unanimously endorsed.

The resolution submitted by Mr. Gock-  
eler declares it does not "put the Board of  
Trade upon record as either favoring or  
opposing the adoption" of a prohibition  
law, but that "the effectiveness and the  
value of a law prohibiting the liquor traf-  
fic are measured by the strength of the  
local public sentiment back of such a law  
to compel its enforcement."

The action of the directors will be taken  
up by the full board at a meeting to be  
held this month, the date of which has  
not been fixed.

The directors at the meeting authorized  
the secretary of the organization, J.  
Harry Cunningham, to negotiate for  
larger quarters for the board in its pre-  
sented location. One room, or probably two,  
will be taken over. The board's mem-  
bership has been doubled within the past  
four years, and with the increase in its  
other business, quarters are too small,  
it has been found.

The directors elected these members to  
the board: Henry C. Morris, Harry A.  
Swagart, M. Becker, Jr., Edward P.  
Abbe and Levi Cooke.

**SINGLE MONETARY PLAN  
URGED FOR PAN-AMERICA**

CONTINUED FROM PAGE ONE.

questions affecting the Americans. No  
possible advantage could be gained by  
the United States from the forcible  
settlement of European troubles.

Mr. Bryan said that to Latin America  
belongs the honor of first accepting the  
proposal to settle disputes by arbitration  
and of all the countries composing Latin  
America there is only one not bound to  
the United States by treaty.

The first real business meeting of the  
congress since its organization was held  
at the New Willard yesterday morning.  
The meeting, which was presided over by  
ambassador Eduardo Suarez-Mujica, of  
Chile, presided over the meeting.

The executive session for the purpose of  
considering resolutions and other matters.  
Officially the committee appointed at the  
meeting was formed to co-ordinate all  
the powers of the various sections and  
put it in shape for final action at the  
congress in general session on Saturday.

The committee will be known as the  
"executive committee," and consists of the  
heads of each delegation attending the  
congress, with the addition of James  
Brown Scott, of the Carnegie Founda-  
tion for Peace. Mr. Scott will vote joint-  
ly with each delegation.

Representatives of the United States, am-  
bassador Suarez, president of the con-  
gress, will be ex officio chairman of the  
committee, and Harry Ralph Ringe, sec-  
retary of the United States delegation,  
will be recording secretary.

A plea for a monetary uniformity in the  
Latin Hemisphere was made by the  
bankers at the New Willard yesterday  
morning. The most striking recommendation  
of the establishment of a monetary  
union in America similar to the  
Latin monetary union of Europe, was  
made by Prof. Guillermo Sublet, of the  
University of Chile.

Other experts taking part in the dis-  
cussion were Prof. E. W. Kemmerer, of  
Princeton, and George F. Riggs, of the  
National City Bank of New York.

The organization and development of  
a Plan for the Systematic Exchange  
of University Students and Professors  
Between the Several American Rep-  
ublics" was the subject of an address  
by Prof. John Basil Moore, of Colum-  
bia University, before delegates who are  
interested primarily in educational prob-  
lems. Certain difficulties, which have  
not heretofore been considered in the  
discussions of the problems, were pointed  
out by Prof. Moore.

The fact must be admitted, he said,  
that little or no account has ever been  
taken either of experience or of the in-  
herent difficulties of the subject of ex-  
change. Instead of making suggestions  
and assumptions, Prof. Moore said the time  
has come when the problem should be  
examined at close quarters and an en-  
deavor made to understand it.

The establishment of an educational in-  
stitution in Panama to serve as an in-  
tellectual link to all the American re-  
publics was suggested by Prof. Narciso  
Carr, director of the National Conserva-  
tory of Music and Declamation of Pan-  
ama, during a speech entitled "On the  
Road Toward the Pan-American Univer-  
sity" before a session of the subsections  
on university education and exchange of  
professors and students of the section on  
education.

Another speaker, Senorita Graciela  
Mandujano, spoke of the state of mod-  
ern language in Chile, and how the dif-  
ficulties connected with this study were  
overcome by the application of modern  
methods.

**For Friendly Relations.**

Declaring that his country was wait-  
ing and anxious to resume the century-  
old friendship which has been broken,  
Don Ganzaio Malja, of Colombia, made  
a stirring appeal for the resumption of  
friendly relations between Colombia and  
the United States. Don Malja stated  
that in making this utterance he was  
doing so in his personal capacity, and  
not in any sense as a representative of  
his government. The interests of North  
and South America, he said, are identical  
and should never clash.

Don Malja preceded Santos Dumont in  
his address on aircraft. He said the ad-  
vancement of civilization depends on  
transportation and his efforts lay in try-  
ing to find a means for overcoming the  
transportation difficulties of Colombia.  
He was purely patriotic and not from sel-  
fish motives of any sort.

A demonstration of the gyroscope, the  
device which made possible the use of  
the aeroplane as a passenger and freight-  
carrying machine and of which he is the  
inventor, was given by Elmer A. Sperry,  
of New York. The inventor explained  
the application of the device to aero-  
planes and ships. A model machine was  
used in the demonstration.

At the same meeting solar power was  
discussed by Prof. A. E. Douglas, of  
the University of Arizona, and Prof. H.  
E. Kimball, of the Weather Bureau. Eight  
hours of sunlight at Tucson, Ariz., ac-  
cording to the instruments of Prof. Doug-  
lass, develops sufficient energy to pro-  
duce \$1,000,000 worth of electric power.
